# **Breaking down the buzzwords:**

# DEBUNKING 11 COMMON **SUSTAINABILITY MYTHS**

With many business leaders adapting to the growing demands to make sustainable choices, it's important to understand the truth behind today's biggest sustainability trends to ensure your actions make a real impact.

decarbonize the airline industry.

### **BUSTED**

SAF will only meet 4% of the total airline industry's needs by 2030 and we

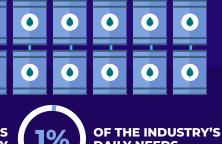

need to take action now. Remember to consider orders of magnitude

At the current rate of production,

when it comes to SAF. The airline industry is burning one billion liters of oil every day.

OF SAF IS ONLY

MYTH #2

than fossil fuel when burned in the atmosphere.

Sustainable aviation fuel (SAF) releases less CO,

## SAF releases the same amount of CO<sub>2</sub> as fossil

BUSTED

fuel, but when you account for the total SAF lifecycle, it can be up to 80% more carbon efficient than fossil fuel. SAF's carbon efficiency is completely dependent

on the material and energy used to make the fuel. For example, SAF made synthetically in the U.S. with the current

energy grid could be up to **2x or 3x worse** for the environment than fossil fuel based on the energy mix used in production.

**UP TO** 

worse for the environment

**MYTH #3** 

**Direct air capture technology** will absorb all global emissions.

#### BUSTED Direct air capture technology will

only play a minimal role in reducing global emissions. For example, one plant in Switzerland currently only absorbs 4,000 tons of CO<sub>2</sub> per year.

BUSTED

MYTH #4

travel-related emissions.

Offsetting will cancel out my

of offsetting projects result in actual emissions decrease **DID YOU KNOW?** It would take trees from a

ONLY

reforestation project between 35-45 years to absorb the carbon from a single flight from New York to London.

BUSTED

**MYTH #5** 

Trees are the best nature-based

resource to absorb our emissions.

# your carbon offsetting strategy,

great whale absorbs a significant **amount of CO**, taking that

food industry emits in a year.

**Phytoplankton** 

alone absorb 2x more CO,

than what the

reducing our emissions first. Carbon

**MYTH #6** 

BUSTED Carbon neutrality is a long-term goal that can only be achieved by drastically

### at a global level, not by individual companies.

The Science-Based Target Initiative (SBTi) asserts that no carbon neutrality claims should be made until long-term targets are met.

neutrality can only be achieved

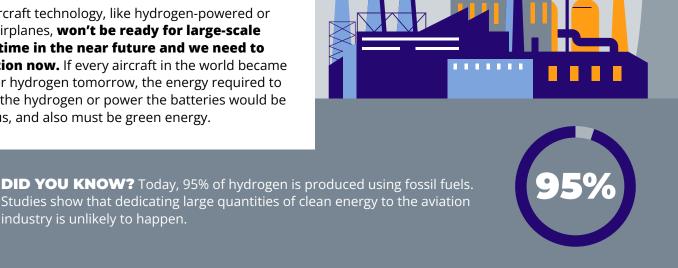

**BUSTED** 

enormous, and also must be green energy. **DID YOU KNOW?** Today, 95% of hydrogen is produced using fossil fuels.

take action now. If every aircraft in the world became electric or hydrogen tomorrow, the energy required to produce the hydrogen or power the batteries would be

industry is unlikely to happen.

plane from New York to Los Angeles.

BUSTED On average, flying economy is 3x

**MYTH #8** 

All travelers should fly in economy class.

comfort—particularly on long-haul flights.

Taking the train is

more carbon

efficient than the

plane on average

more CO, efficient than business class.

However, while the priority should be to travel (much) less, when traveling it is important to also consider the length of a trip, traveler wellness, satisfaction, and

time and can sometimes be more

cost efficient. Plus, it's more

comfortable and allows for the

traveler to rest or be productive.

**MYTH #10** 

**3** X MORE **MORE Average Person Hotel Room Resort Room** Per Day Per Day Per Day

or 8X more than what a European uses per day.

**BUSTED** The type of property you book affects the environmental impact of your trip. For example, water usage at a typical hotel is 500L per room per day on average. That's 4X more than what an average European uses per day. Resorts can use up to 1,000L per room per day,

It doesn't matter what kind of hotel

I choose when booking a business trip.

**''** 

have a drastic effect on global emissions.

**DID YOU KNOW?** Carbon emissions per room are also significantly higher in properties with more

amenities — like pools, saunas and restaurants.
